# United States Department of Agriculture,

## BUREAU OF PLANT INDUSTRY,

WASHINGTON, D. C.

### BULLETINS OF THE BUREAU OF PLANT INDUSTRY.

The Bureau of Plant Industry, which was organized July 1, 1901, includes Vegetable Pathological and Physiological Investigations, Botanical Investigations, Farm Management (including Grass and Forage Plant Investigations), Pomological Investigations, and Experimental Gardens and Grounds, all of which were formerly conducted as separate Divisions; and also Seed and Plant Introduction and Distribution; the Arlington Experimental Farm; Investigations in the Agricultural Economy of Tropical and Subtropical Plants; Drug and Poisonous Plant Investigations; Tea Culture Investigations; the Seed Laboratory; and Dry Land Agriculture and Western Agricultural Extension.

Beginning with the date of organization of the Bureau, the several series of bulletins of the various Divisions were discontinued, and all are now published as one series of the Bureau. A list of the bulletins issued in the present series follows.

Attention is directed to the fact that "the serial, scientific, and technical publications of the United States Department of Agriculture are not for general distribution. All copies not required for official use are by law turned over to the Superintendent of Documents, who is empowered to sell them at cost."

**All applications for such publications should, therefore, be made to the Superintendent of Documents, Government Printing Office, Washington, D. C., accompanied by a postal money order for the required amount or by cash. Stamps and personal checks will not be accepted in payment for publications.**
